Scanband Version of Form 80-491-10-5-1-000 Individual Income Tax Statement Additional Dependents

There must be data in all fields of the scanband. There cannot be any handwritten information on these forms. The preparer or taxpayer should not be able to print this form with data missing from the scanband.

We have tried to include the changes from the previous year in this list, but we may have missed a few. Please check the form as well as this list.

1) Updated barcode, year, and form number.

- 2) Added Duplex or Photocopies not Acceptable.
- 3) Added more lines for dependent name
- 4) Updated the agency name

Key to the data fields for the Individual Income Tax Statement of Additional Dependents form scanband version for 2010. The form number is 80-491.

Page 1:

The top left corner of the barcode is located at position x=6, y=4 on the 10/6 grid.

The top right registration mark is located at the top right corner of grid box x=80, y=4.

The lower left corner of the scanband box must be located on the left and bottom edge of grid space x=6, y=18.

"MS" to the left of the header must begin in grid space 27/4 and end in grid space 28/4 and be in an Courier 12 pt. Page 2:

The top left corner of the barcode is located at position x=6, y=4 on the 10/6 grid.

The top right registration mark is located at the top right corner of grid box x=80, y=4.

The lower left corner of the scanband must be located on the left and bottom edge of grid space x=6, y=19.

"MS" to the left of the header must begin in grid space 27/4 and end in grid space 28/4 and be in an Courier 12 pt.

The following is the labeling and the description of the items to be included in the Scanband of this form. The beginning and ending data positions are included in one of the templates for the form. The field length is included in this key for each data position. Grid positioning given is from the first grid space to the last grid space included in a data field. (Example 22/9 to 29/9 is 8 grid spaces) You should use this information to position the data on the returns. Do not use a grid overlay to determine the positions from a printed paper form. The field length specified assumes using a **Courier 12 point font**, which is the required font. In the Scanband, the dependents fields C for child, P parent and R relative should be left justified. All other fields should be right justified. All fields in the scanband must be filled, except if there is no spouse. If a field is Blank in the scanband, your software should fill the field using a "0" (zero) for numeric fields and an "N" for alpha or alphanumeric fields. The numeric fields in the scanband should not contain any commas, cents, decimals or other formatting information. The numeric fields in the body of the return should contain dashs (Example: SSN 999-99-9999) in the body of the form.

Page 1) of the form:

Field Name	Description
TSSN	This is a numeric field. This is the taxpayer's Social Security Number. This field is 10 characters long. The last digit in this field is a check digit. This check digit is in the scanband but not in the body of the form. Check digits should be calculated using Modulus 10 Self-check Digit Computation found in the Mississippi Guidelines for Provider of Substitute Forms.
SSSN	This is a numeric field. This is the spouse's Social Security Number. This field is 10 characters long. The last digit in this field is a check digit. This check digit is in the scanband but not in the body of the form. Check digits should be calculated using Modulus 10 Self-check Digit Computation found in the Mississippi Guidelines for Provider of Substitute Forms.
B1 - B20	These fields are alpha fields, for dependents and indicate relationship to taxpayer. A code should be entered: C for child, P for parent, and R for relative. The code should go in the scanband and in the body of the form under DEPENDENTS. These fields are 1 character long.
C1 - C20	These fields are numeric field. This is the dependents Social Security Number. This field is 10 characters long. The last digit in this field is a check digit. This check digit is in the scanband but not in the body of the form. Check digits should be calculated using Modulus 10 Self-check Digit Computation found in the Mississippi Guidelines for Provider of Substitute Forms.
